

## \* Switch: (10)

- \* You can use switch instead of multiple <sup>nested</sup> if-else.

### - Syntax:

Switch (condition):

{

case :

// body

break;

case :

// body

break;

default:

~~break;~~

// body

}

- If you didn't use break it will execute until it met break.

## - Enhance Switch:

- Doesn't require break.

## - Syntax:

Switch (condition):

{

case : → //body;

case : → //body;

default : → //body;

}
